- *Standard Video Format...No Special Software or CODECS*
- *Files are Compatible with most Case Management Software*

KEY FEATURES...

SSD Recording Safety – The LX records files directly to removable solid-state memory. Sealed, finalized DVDs are available subsequent to recording termination. Files may also be exported via the removable solid-state memory or automatically uploaded to a server for archival storage using the optional video encoder. **Systems are both UK ABE and PACE Codes of Practice, E and F compliant.**

Time/Date/Metadata Authentication – The recorder provides unique Time/Date/Metadata File Encryption as a permanent frame overlay for both reference and air-tight authentication of each recording.

Intuitive Touchscreen and Simple Button Control – LX is designed for ease-of-use and features one-touch operation to start and stop recording locally. The large touchscreen display makes the entry of case information and system programming almost second nature. The file database is searchable by date or by case information.

Latest Camera Technology – Legaltek integrates the latest Sony EXMOR camera technology in a variety of disguise and non-disguise camera enclosures, ensuring unsurpassed image quality in any interview environment. Cameras may be recorded full screen or in a picture-in-picture configuration.

Perfectly Synchronized Audio/Video – The sensitive, auto-gaining professional balanced PZM microphone system with active audio processing virtually eliminates signal interference and suppresses environmental noise. Active audio processing enhances the intelligibility of soft-spoken subjects and increases the accuracy of interview transcriptions.

Standard Video Format – LX records video in the standard .MPG2 format allowing files to be immediately exported via USB or DVD. Recordings can be played by the viewer's choice of application without any special software or codecs. Secure, recorded files are compatible with most agencies existing enterprise case management software.

Our technical group has provided purpose-engineered solutions for law enforcement professionals and government entities for over 25 years.

- No License Fees
