- *Simple One-Button Operation... Web Based Viewing/Control*
- *Embedded Time/Date/Metadata Authentication*
- *Standard Video Format...No Special Software or CODECS*
- *Files are Compatible with most Case Management Software*

KEY FEATURES...

Latest Camera Technology – *Legaltek* integrates the latest High-Definition camera technology in a variety of disguise and non-disguise camera enclosures, ensuring unsurpassed image quality in any interview environment. Cameras may be recorded full screen or in a number of user defined picture-in-picture and picture-by-picture configurations.

Professional Microphones – The sensitive, auto-gaining professional balanced PZM microphone system with active audio processing virtually eliminates signal interference and suppresses environmental noise. Active audio processing enhances the intelligibility of soft-spoken subjects and increases the accuracy of interview transcriptions.

Simple Button Control – *LXMonarch* is designed for ease-of-use and features one-click operation to start and stop recording locally.

Double Recording Redundancy – The *LXM* can record master quality H.264 files locally on removable solid-state memory for immediate availability, while simultaneously targeting a network-mapped drive for both immediate review and archival storage.

Embedded Time/Date/Metadata Authentication – The *LXM* provides individual frame watermarking and a permanent visual time/date/user overlay for both reference and authentication of recordings.

Local or Network Control – IT administrators can easily define profiles for local recording and live streaming via the Command Center, a web-based control application. Recording can be controlled using any device on the network that supports a standard web browsing application, such as a tablet.

Standard Video Format – *LXV* records video in the standard .MP4 format allowing files to be immediately exported via USB or DVD. Recordings can be played by the viewer's choice of application without any special software or codecs. Secure, recorded files are compatible with most agencies existing enterprise case management software.

- No License Fees
- Unlimited Users
- No Charge Software Upgrades
- One Year Factory Warranty
- Telephone and On Line Technical Support
